TASK 2

Read the text and the questions below. For each question, mark the correct letter A, B or C.

In 1969, three people in a tiny spaceship made history with a trip the world will never forget. The three men were Michael Collins, Edwin "Buzz" Aldrin, and Neil Armstrong. The first manned lunar landing mission was called Apollo 11 and their destination was the Moon.

Tens of thousands of people worked on the Apollo project to send those men to the Moon. The project, also known as Apollo program, took 10 years of preparation. The first manned Apollo flight was a disaster because the spacecraft caught fire on the ground. But NASA continued with the Apollo program. On the Apollo 8 mission, the astronauts flew around the Moon ten times. They were almost ready for the first Moon landing.

The rocket that carried the spacecraft and the astronauts around the Moon was called the Saturn 5. It took 3 days, 3 hours and 49 minutes to the Moon. The Apollo 11 mission used a special lunar module designed only for landing on the Moon. It was called the "Eagle". On July 20, 1969, the Eagle landed on the Moon's surface. Only two astronauts actually stepped on the Moon that day. Neil Armstrong became the first person to walk on the Moon. Edwin "Buzz" Aldrin followed about twenty minutes later. The astronauts installed a TV camera, and the whole world watched the landing on TV. Michael Collins waited for them in the spacecraft and circled around the Moon. It was his job to take care of the spacecraft that would take them all home. He had to make certain nothing happened to it.

1. What is the writer's main purpose in writing the text?
 - A) To talk about Edwin "Buzz" Aldrin
 - B) To talk about the first trip to the Moon
 - C) To explain that the first Apollo mission was a disaster
2. In which mission did the astronauts for the first time fly around the Moon?
 - A) Apollo 11
 - B) Apollo 10
 - C) Apollo 8
3. How did the "Eagle" arrive on the Moon?
 - A) It flew there on its own
 - B) Neil Armstrong sent it there
 - C) It was carried by the Saturn 5 rocket
4. What did Michael Collins do?
 - A) He installed a TV camera.
 - B) He circled in the spacecraft.
 - C) He waited in the "Eagle".
5. What can a reader find out from the text?
 - A) Why the Apollo programme was so successful
 - B) When humans first visited the Moon
 - C) Who the commander of Apollo was

TASK 3

Read the text about Frankenstein. Look at the sentences 1-10 and decide whether they are true or false.

At the age of 15 Victor Frankenstein saw how lightning could completely destroy a tree. He realised how strong electricity was and he became fascinated by its power. When he was 17 he went to university to study science. He wanted to find the answers to the questions: How does life begin? Is it possible to put life into dead things? He started experimenting with electricity ...

The teachers realised that I was doing very important work, and so they gave me my own laboratory. There was a small flat above the laboratory, where I lived, and sometimes I stayed inside the building for a week and did not go out. Above the laboratory I built a very tall mast. It was 150 metres high, and higher than the tallest building in the city. The mast could catch lightning (*a flash of light in the sky caused by electricity*) and could send the electricity down to my machine in the laboratory. I had never forgotten the lightning that had destroyed the tree. There had been so much power in the electricity of that lightning. I believed I could use that electricity to give life to things that were dead. I will say no more than that. The secret of my machine must die with me. I was a very clever scientist, but I did not realise then what a terrible mistake I was making.

In my laboratory I made a body. I bought or stole all the pieces of human body that I needed, and slowly and carefully, I put them all together. I did not let anybody enter my laboratory or my flat while I was doing this awful work. I was afraid to tell anybody my terrible secret. I had wanted to make a beautiful man, but the face of the creature was horrible. Its skin was thin and yellow, and its eyes were as yellow as its skin. Its long black hair and white teeth were almost beautiful, but the rest of the face was very ugly. Its legs and arms were the right shape, but they were huge. I had to use big pieces because it was too difficult to join small pieces together. My creature was two and a half metres tall. For a year I had worked to make this creature, but now it looked terrible and frightening. I almost decided to destroy it. But I could not. I had to know if I could put life into it. I joined the body to the wires (*long thin pieces of metal that carry electricity*) from my machine. More wires joined the machine to the mast. I was sure that my machine could use electricity from lightning to give life to the body.

I watched and waited. Two days later I saw dark clouds in the sky, and I knew that a storm was coming. At about one o'clock in the morning the lightning came. My mast began to do its work immediately, and the electricity from the lightning travelled down the mast to my machine. Would the machine work? At first nothing happened. But after a few minutes I saw the creature's body begin to move. Slowly, terribly, the body came alive. Its arms and legs began to move, and slowly it sat up. The dead body had been an ugly thing, but alive, it was much more horrible. Suddenly I wanted to escape from it. I ran out of the laboratory and locked the door. I was filled with fear at what I had done.

		TRUE	FALSE
1	Victor Frankenstein didn't impress his professors at university.		
2	He didn't work in laboratory with other students.		
3	Victor's laboratory was more than 150 meters away from the mast.		
4	He found a way to get electricity from lightning into his flat.		
5	Other students were excited by his discoveries.		
6	He knew that the consequences of his project could be dangerous.		
7	Frankenstein used parts of dead people for his project.		
8	He needed 12 months to make the creature.		
9	He connected the body to the machine and it began to move slowly.		
10	He wasn't satisfied with the results of his work.
